

# **Problems In The Epistemology of Quantum Physics**

## **“Metaphysics as a Core of Scientific Knowledge”**

**Dr. Imad Fawzi Shueibi\***

### **Abstract**

This research deals with metaphysics as an essential structure in any scientific work. This has been achieved through intuitional analysis of facts as well as mathematics and presumptions that are based on the “core”, let alone the teleological orientation in science and the contradiction between appearance and reality.

The paper finds out that the metaphysical structure in science is formed in accordance with the formational structure of the human mind, and it provides various items of evidence to prove this.
