- A. blog B. am blogging
C. blogging D. was blogging

b are temporary and happening around now, but maybe not at this exact moment:

Now I'm writing a book about street food. We're working in Mexico for a few days.

c are changing over a period of time:

My blog is becoming more popular every year.

More and more people are visiting Thailand on holiday these days.

- We use the **Present Simple** for:

a habits and routines with *always, sometimes, never, everyday, every year, etc.*:

I always _____ the street food wherever I go. I come here every year.

- A. try B. trying
C. am trying D. have tried

b things that are permanent, or true for a long time:

I live in London. People still eat a lot of street food in Indonesia.

c verbs that describe states (*be, have got, want, etc.*):

The country's capital has got some fantastic street food.

If you want to make the perfect burrito, start with a freshly-made flour tortilla.

ACTIVITY AND STATE VERBS

- Activity verbs** talk about activities and actions. We can use activity verbs in the Present Simple and the Present Continuous (and other continuous verb forms):

I watch TV every evening. I'm watching TV now.

Typical activity verbs are: *watch, talk, spend, eat, learn, buy, cook, take, happen.*

- State verbs** talk about states, feelings and opinions. We don't usually use state verbs in the Present Continuous (or other continuous verb forms):

I like burritos. not ~~I'm liking burritos.~~

- Learn these common state verbs.

'be and have' verbs	'think and know' verbs	'like and hate' verbs	senses	other verbs
be have (got) own belong	know think believe understand remember forget mean	like love hate want prefer	see hear smell touch taste	seem need hope agree cost weigh contain

- TIPS • We often use **can** with verbs that describe the senses to talk about what is happening now:

I can hear a noise outside.

I can't see anything.

- Some verbs can be **both** activity verbs and state verbs:

I _____ dinner at the moment. (activity)

People still eat a lot of street food in Indonesia. I'm still waiting for him to call me.

POSITIVE, NEGATIVE AND QUESTION FORMS

Present Continuous

- We make the Present Continuous positive and negative with: [subject + **be** + (not) + verb+ing]

You/We/They are/aren't writing a blog.
He/She/ It's/ isn't becoming more popular.

- We make Present Continuous questions with: [(question word)+ **am, are or is** + subject + **verb+ing**]

What am I doing here?

Who are you/we/they talking to?

Is he/she/ it working today?

Present Simple

- For *I/you/we/they*, the Present Simple positive is the same as the infinitive.
- For *he/she/it*, we add **-s** or **-es** to the infinitive:

he lives ;she goes; it works.

- We make the Present Simple negative with: [subject + **don't or doesn't** + infinitive]

I/You/We/They don't live here.

He/She/It doesn't work.

- We make Present Simple questions with: [(question word) + **do or does** + subject + infinitive]

Where do I/you/we/they live?

Does he/she/it work?

Past Simple and Past Continuous

- We use the **Past Simple** for:

a a single completed action in the past.

b a repeated action or habit in the past.

I listened to her second album all the time. I practised for hours every day.

c a state in the past.

My boyfriend wanted to sell it on eBay.

c an action in progress when another (shorter) action happened.

While I was playing my last track, the manager came over and congratulated me.

TIPS• We can also use the Past Continuous when the longer action is interrupted:

While we _____ a picnic, it _____ to rain.

A. were having, started B. are having, started

C. have, starts D. had, started

- We can use *when* or *while* with the Past Continuous:

He phoned me when/while I was waiting for the train.

- We don't usually use *while* with the Past Simple:

~~**While he phoned me, I was waiting for a train.**~~

Past Simple

- We usually make the **Past Simple** positive of regular verbs by **adding -ed or -d to the infinitive**: **work-+ worked, live-+ lived, etc.**

There are no rules for irregular verbs. There is an Irregular Verb List.

- We make the **Past Simple negative** with: [subject + **didn't** (= did not) + infinitive]

He didn't go to work yesterday.

- We make **Past Simple** questions with: [(question word)+ **did** + subject + infinitive]

What time did he call you?

Past Continuous

- We make the **Past Continuous positive and negative** with:[subject + **was, were, wasn't or weren't** + verb+ing]

I/He/She/ It was/wasn't working when you called.

• We can't use **used to** to talk about one action in the past:

That night she sang for over two hours. not ~~That night she used to sing for over two hours.~~

TIP • We can only use used to to talk about the past. To talk about habits or repeated actions in the present, we use usually + Present Simple. Compare these sentences:

I used to work at the weekend. (I don't work at the weekend now.)

I usually work at the weekend. (I work at the weekend now.)

POSITIVE AND NEGATIVE

• We make **positive** sentences with **used to** with: [subject + used to + infinitive]

 C. Did you use to D. Did you use

Where did you use to live when you were young?

• Notice how we spell the negative and question forms:

didn't use to not ~~didn't used to~~; did you use to not ~~did you used to~~.

• In the **negative** we can say **didn't use to** or **never used to**:

I never used to go to gigs when I was young.

• The **short answers** to **yes/no** questions with **used to** are:

Yes, I did./No, I didn't.; Yes, he did./No, he didn't. , etc.

Past Perfect

• When there is more than one action in the past, we often use the Past Perfect for the action that happened first.

second action (Past Simple)	first action (Past Perfect)
Cho joined the expedition after He also read messages that Ed calculated that	Luke had gone back to the UK. people had sent him. he'd walked about 6,000 miles.

• Compare these sentences:

1 When I turned on the TV, the programme started.

(First I turned on the TV, then the programme started almost immediately.)

2 When I turned on the TV, the programme had started.

(First the programme started, then I turned on the TV.)

TIPS • If the order of past events is clear from the context, we don't usually use the Past Perfect:

We had dinner, watched TV and then went to bed.

• We don't always use the Past Perfect with **before** and **after** because the order of events is clear:

We (had) finished eating before they arrived.

I went home after the meeting (had) finished.

POSITIVE AND NEGATIVE

- We make the **Past Perfect positive** with: [subject + **had** or **'d** + past participle]

Present Perfect Simple

- We use the Present Perfect Simple for experiences that happened some time before now, but we don't know or don't say when they happened:

I've worked in the USA and in Europe.

We've been away together a few times.

To give more information about an experience we use the Past Simple:

Three days ago a guy set off on his own into the mountains.

D. has been, since

TIPS• We often use the **Present Perfect Continuous** with verbs that talk about longer activities: *learn, rain, try, play, work, read, wait*, etc.:

I've been learning English for five years.

• We don't usually use the Present Perfect Continuous with verbs that talk about short actions: *start, find, lose, break, buy, stop*, etc.:

I've started a course. not ~~I've been starting a course.~~

• With some verbs, both verb forms are possible:

I've lived/been living here for five years.

I've done my homework. (The homework is finished now.)

HOW LONG ... AND HOW MANY ...

• We usually use the **Present Perfect Continuous** to say **how long** an activity has been happening:

Their television company, Lonely Planet TV, has been making programmes since 2004.

Lonely Planet has published over 650 guidebooks since the company began.

How many countries have you visited?

How many books has Lonely Planet published?

TIP• We can also make questions with the Present Perfect Simple and *How much (+ noun) ... ?*:

How much money have you spent so far?

First Conditional

We use the first conditional to talk about the result of a possible event or situation in the future.

The **if clause** talks about things that are possible, but not certain.

If I'm late again, I'll lose my job (maybe I'll be late again). The main clause says that we think the result will be in this situation. (I'm sure I'll lose my job).

if clause	main clause
------------------	--------------------

(if + present simple)	(will/won't + infinitive)
If I am late again, If we don't get there by five,	I will lose my job. We'll miss the plane.

Tips:

The **if clause** can be first or second in the sentence, when we start with the **if clause** we use a comma (,) after this clause. When we start with the main clause, we don't use a comma: You'll be OK if you get a taxi.

We don't usually use will/won't in the **if clause**: ~~If I'll be late again, I'll lose my job.~~

Future time clauses with when, as soon as, before, after, until

We can use sentences with when, as soon as, before, after and until to talk about the future:
I'll pack before I go to bed.

After these words we use the Present Simple:
I'll call Frank when I get home **NOT** I'll call Frank when I'll get home.

In the main clause we use will/won't + infinitive:
As soon as I finish this report, I'll go to the bank.

We use when to say we are certain something will happen.

We use if to say something is possible, but it isn't certain.

We use as soon as to say something will happen immediately after something else.

We use **until** to say something stops happening at this time.

As in first conditional sentences, the future time clause with when, as soon as, etc. can come first or second in the sentence:

- After I talk to him, I'll phone the hotel = I'll phone the hotel after I talk to him.

Second Conditional

We use the second conditional to talk about **imaginary** situations:

If I lost my laptop, I'd probably lose my job! (I don't think this will ever happen to me.)

The second conditional talks about **the present or future**.

We often use the second conditional to talk about the opposite of what is true or real: If we didn't have Wi-Fi, this place would be empty. (But we have Wi-Fi, so this is an imaginary situation.)

POSITIVE AND NEGATIVE

If I **lost** my laptop, I'd probably **lose** my job!

A. lost **B. lose** **C. loses** **D. is losing**

If the internet **didn't exist**, I **wouldn't have** a business.

A. have **B. wouldn't have** **C. would** **D. had**

Compare these sentences:

A. If I **have enough** money, I'll **buy** a new laptop.

This is a real possibility (the person might buy a new laptop).

B. If I **had** enough money, I'd **buy** a new laptop.

This is an imaginary situation (the person can't buy a new laptop).

Tips:

The **if clause** can be first or second in the sentence:

We'd lose a lot of customers if our website crashed.

If our website crashed, we'd lose a lot of customers.

We can say If I/he/she/it **was** ... or If I/he/she/it **were** ... in the second conditional:

If I **was/were** rich, I'd buy a big house.

We can use might + infinitive in the main clause of the second conditional to mean 'would perhaps': If they turned off their computers, they might make some new friends. We can use could + infinitive in the main clause of the second conditional to mean 'would be able to': If we didn't have online meetings, I could travel a bit more.

QUESTIONS

We often make questions in the second conditional with **What would you do if ...?**:

What **would you do** if you lost your laptop?

A. you would do **B.** you do **C.** will you **D.** would you do

We can also make yes/no questions in the second conditional:

If someone asked you to lend them your computer, would you do it?

The short answers to these yes/no questions are: Yes, I would./No, I wouldn't. We can also say (Yes,) I might.

Third Conditional

We use the third conditional to talk about imaginary situations in the past.

We often use third conditionals to talk about the opposite of what really happened:

If I'd stayed at home, I wouldn't have met my husband. (She didn't stay at home and so she went to a party and met her husband.)

If I hadn't lost my job, I wouldn't have started my own business. (He lost his job so he decided to start his own business.)

POSITIVE AND NEGATIVE

If **I'd stayed** at home, I **wouldn't have met** my husband.

A. I'd stay **B.** stay **C.** I'd stayed **D.** I am staying

If I **hadn't started** doing this, I **d have got** into a lot more trouble.

A. would get **B.** have got **C.** will get **D.** 'd have got

Tips:

As with other conditionals, in the third conditional the **if clause** can be first or second in the sentence. We use a comma (,) when the if clause is first:

If I hadn't won that race, I'd never have become a serious athlete.

I'd never have become a serious athlete if I hadn't won that race.

We can use could have in the main clause of the third conditional to talk about ability:

If I'd been there, I could have helped you.

We can also use might have in the main clause of the third conditional to mean 'would have perhaps':

If you hadn't got lost, we might have got there on time.

We don't usually use would in the **if clause**: If I'd known, I'd have told you. **Not** if I would have known, I'd have told you.

Was/Were going to, Was/Were supposed to

He's picking them up tomorrow evening after work.

It's going to break the first time she uses it!

• We use *will* for a prediction that is a personal opinion and is not based on present evidence:

But you'll never listen to them again.

TIPS • When we use the *Present Continuous* for future arrangements, we usually know exactly when the arrangements are happening. They are the kind of arrangements we can write in a diary:

I'm having dinner with Richard on Saturday.

• We can also use *be going to* to talk about future arrangements:

What are you going to do tomorrow?

will

When am I going to see you again?
Are you/we/they going to move house?
What's he/she/it going to do tomorrow?

TIP • With the verb *go*, we usually say *I'm going to the cinema*, not *I'm going to go to the cinema*. But both are correct.

The Passive

- In active sentences the focus is on the person or thing doing the action (earthquakes under the ocean). In passive sentences the focus is on the result of the action (tsunamis).
- In passive sentences we can use 'by + the agent' to say what or who does the action.
- We often use the passive when we are more interested in what happens to someone or something than in who or what did the action:

Droughts often happen because all the trees have been cut down.

- We make the passive with: [subject + **be** + **past participle**]

verb form	be	past participle
Present Simple	am/are/is	caused

Present Perfect Simple	have/has been	cut down

safe, safer, safest.
- When the adjective ends in consonant + vowel + consonant, we double the final consonant:
Thin, thinner, thinnest.
- When a two-syllable adjective ends in -y, we change the -y to -i and add -er or -est:
funny, funnier, funniest.

Other 2-syllable adjectives; long adjectives

- We can also use **more** and **most** with nouns:
It's got more space.
It's got the most rooms.

OTHER WAYS TO MAKE COMPARISONS

He _____ be 70. He retired 10 years ago.

A. can't

It could be him. not ~~It can be him.~~

He can't be a millionaire. not ~~He mustn't be a millionaire.~~

He _____ be a millionaire. He takes the bus to work.

Reported speech: Sentences

- We use reported speech to tell someone what another person said.
- We usually change the verb form in reported speech. Look at the table.

verb form in direct speech	verb form in reported speech
Present Simple I still want to be in the programme.	Past Simple She said she still wanted to be in the programme.
Present Continuous I'm having another operation on Friday.	Past Continuous She said that she was having another operation on Friday.

can I can't come to the meeting on Monday.	could She told me she couldn't come to the meeting on Monday.
must You must talk to Max.	had to I told her that she had to talk to you.

SAY AND TELL

- To introduce reported speech we usually use **say** or **tell**.
- We never use an object (me, her, etc.) with **say**: *He said (that) ...*
- We always use an object (me, her, etc.) with **tell**: *He told me (that) ...*

- We don't have to use *that* after *say* and *tell* in reported speech.
- Subject pronouns (*I, he, etc.*) and possessive adjectives (*my, his, etc.*) usually change in reported speech:

"We can't come to your party."
She told me that _____ come to my party.
 A. they couldn't B. we couldn't
 C. they can't D. we can't

TIPS • The modal verbs *could, should, would, might* and *ought to* don't change in reported speech.

- The **Past Simple** doesn't have to change to the Past Perfect. It can stay the same:
"I met him in 2011."
She said she (had) met him in 2011.

- We don't have to change the verb form if the reported sentence is about something general, or something that is still in the future:

"I love classical music."
I told him I love classical music.

- We often change time expressions in reported speech:
tomorrow to *the next day*;
next week to *the following week*;
last week to *the week before, etc.*

Reported speech: questions

- We use reported questions when we want to tell someone what another person asked us.
- We don't use the auxiliaries *do, does* or *did* in reported questions:

He asked if I had any acting work. not ~~He asked if I did have any acting work.~~
He asked _____ any acting work.
 A. if I did have B. did I have
 C. if I have D. if I had

- We use *if* or *whether* when we report *yes/no* questions:

"Are you working at the moment?"
He asked me if/whether I was working at the moment.

- We sometimes use an object (*me, him, etc.*) with *ask*:

He asked (me) whether I was available to start next week.

- The changes in the verb forms in reported questions are the same as reported sentences:

"What other parts have you had recently?"
He asked me what other parts I'd had recently.

REPORTED QUESTIONS

He/She asked (me) He/She wanted to know	question word if/ whether	Subject + verb
--	------------------------------	----------------

He wanted to know where _____ acting.

- A. I've studied B. have I studied
 C. I'd studied D. had I studied

He asked me if/whether I was working at the moment.

TIP • The word *order* in reported questions is the same as in positive sentences:

I asked her where her brother was. not ~~I asked her where was her brother.~~

Reported speech: requests and imperatives

- To report requests, we use: [*asked* + object + (not) + infinitive with to]

He asked me to come to a meeting on Monday.

- To report imperatives, we use: [told + object + (not) + infinitive with to]

He told me to be at their offices at ten.

He told me _____ any more work.

- A. to don't accept B. not to accept
C. not accept D. don't accept

Wishes

- We often use *I wish ...* to talk about imaginary situations in the present or the future.
- We often use sentences with *I wish ...* to talk about the opposite of what is true or real:
I wish we had a car. (The woman hasn't got a car, but she would like to have one.)
- To make wishes about **states** we use *wish + Past Simple*:

I wish we _____ a car.

- A. have B. had C. are having D. will have

I wish I was on a beach somewhere.

- To make wishes about **activities happening now** we use *wish + Past Continuous*:

I wish you _____ to the theatre with me.

- A. come B. are coming C. came D. were coming

- To make wishes about **abilities or possibilities** we use *wish + could + infinitive*:

I wish I could come with you.

- To make wishes about **obligations** we use *wish + didn't have to + infinitive*:

I wish we _____ to this party.

- A. didn't have to go B. have to go C. will go D. are going

TIPS • We can say *I wish I/he/she/it was ...* or *I wish I/he/she/it were ...* :

I wish I was taller. = I wish I were taller.

- We often use the second conditional to give reasons for wishes:

I wish we had a car. If we had one, I wouldn't spend half my life waiting for buses.

- Notice the difference between *I wish ...* and *I hope ...* :

A I wish you were coming to the party.

(I know that you aren't coming = imaginary situation)

B I hope you're coming to the party.

(I think that you might come = real possibility)

- We can also make sentences with *wish* with *you/he/she/we/they*:

He wishes he lived somewhere hotter.

We wish we could afford a holiday.

Relative clauses with *who, that, which, whose, where* and *when*

- We often use relative clauses to say which person, thing, place, etc. we are talking about.

- In relative clauses we use:

a *who* or *that* for people:

The woman _____ I was sharing a room with used to work in a hospital.

- A. who B. which C. whose D. when

I'm the type of person that eats three meals a day.

b *that* or *which* for things:

The food that we usually eat contains toxins which stay in our bodies.

c *where* for places:

I was taken to the guest house where everyone was staying.

d *whose* for possessives:

The woman _____ fasting programme we were following was French.

- A. whose B. who C. which D. that

e *when* for times:

This was also when I started getting really hungry.

TIPS • We usually use *who* for people (*that* is also correct).

- We usually use *that* for things (*which* is also correct).
- We don't use *what* in relative clauses:

~~**The food what we usually eat is homemade.**~~

We can use *what* to mean 'the thing/things that':

Now I'm much more careful about what I eat.(=the things that I eat).

LEAVING OUT WHO, THAT, WHICH

- We can leave out **who, that or which** when it isn't the subject of the relative clause.
- Compare the relative clauses in these sentences:

A I'm the type of person that eats three meals a day.

In this sentence we must use *that* because it is the subject of the relative clause.

B The food (that) we usually eat contains toxins.

In this sentence we can leave out *that* because it is the object of the relative clause (we is the subject).

TIPS• We never leave out *whose* in relative clauses.

- We can usually leave out *where* if we add a preposition at the end of the relative clause:

That's the cafe where I met my wife. = That's the cafe I met my wife in.

- We can only leave out *when* if the time reference is clear:

Monday's the day (when) I play tennis.

Verb patterns (1)

- When we use two verbs together, the form of the second verb usually depends on the first verb:

start singing; decided to make; can't celebrate; tell their children to make; make it shine, etc.

This is called a verb pattern.

start/ like/ begin/ love/ keep/ enjoy/ finish/ mind/ prefer/ hate/ continue	+ verb+ing (doing)
decide/ remember/ forge/ try/ start/ like/ begin/ love/ need/ would like/ want/ plan/ prefer/ hate/ continue/ learn/ seem	+ infinitive with <i>to</i> (to do)
can/ might/ could/ should/ would/ will/ must/ would rather	+ infinitive (do)
tell/ ask/ help/ allow/ teach/ would like/ want/ pay	+object+ infinitive with <i>to</i> (sb/sth to do)
make/ help/ let	+ object + infinitive (sb/sth do)

TIPS• The verbs in blue in the table have more than one verbpattern. Both verb patterns have the same meaning:

I started to write an email. = I started writing an email.

- In **British English**, *like/love/hate*+ verb+ing is more common:

I like/love/hate watching golf.

In **American English**, *like/love/hate* + infinitive with *to* is more common:

I like to watch golf.

I'm planning _____ a new house next year.

A. buy

B. to buy

C. buying

D. to buying

Verb patterns (2): reporting verbs

- We often use verbs like *offer*, *invite*, etc. to report what people say. These verbs are followed by different verb patterns.

Invite/ remind/ warn	+ object + (not) + infinitive with <i>to</i>
----------------------	---

	<i>(sb/sth (not) to do)</i>
Offer/ refuse/ promise/ agree/ threaten	+ <i>(not)</i> + infinitive with <i>to</i> <i>((not) to do)</i>
admit/ suggest	+ <i>verb+ing</i> <i>(doing)</i>

Rupert **invited her to have** dinner with his family.
 Dom **offered to give** Kat a lift home.
 Dom **admitted _____** madly in love with Kat.

- A. be B. to be C. being D. to being

Question tags

- We usually use question tags (*don't you?*, etc.) to check information that we think is correct.
- We usually use the auxiliary in question tags:
You live next door to Lisa, _____?
 A. do you B. don't you C. do you live D. are you
- We **only use pronouns** in question tags:
Barbara went to Liverpool University, _____?
 A. does she B. didn't Barbara C. did she D. didn't she
- If the main verb is **positive**, the question tag is usually **negative**:
It was a great match yesterday, wasn't it?
- If the main verb is **negative**, the question tag is usually **positive**:
You haven't ordered any food yet, have you?
- We often use short answers (Yes, I do. No, I don't., etc.) to say that the information is correct.
- When the information isn't correct, we often use **actually** after the short answer to sound more polite, then give more information:
A You've been diving, haven't you?
B No, I haven't, actually. It sounds a bit too dangerous to me.
- TIPS • We can also use *Yes, that's right.* to say that the information is correct:
A You're from London originally, aren't you?
B Yes, that's right./Yes, I am.
- If the main verb is in the positive form of the Present Simple or Past Simple, we use *don't, doesn't or didn't* in the question tag:
Jim lives in the USA, _____?
 A. does he B. does Jim
 C. doesn't he D. doesn't Jim
- We say **aren't/?** not **amn't I?:**
I'm late, _____?
 A. am I B. amn't I C. aren't I D. don't I

very good not ~~very fantastic~~;

incredibly hot not ~~incredibly boiling~~, etc.

• *Fairly* is less strong than *very*. *Incredibly* and *extremely* are stronger than *very*.

It's important that they are allowed to enjoy themselves.

Sandra cuts her children's hair _____.

A. *itself* B. *themselves* C. *herself* D. *her self*

• We use *by myself, by yourself, etc.* to mean *alone*:

This means children spend most of their free time studying by themselves.

• We also use reflexive pronouns to emphasise that we do something instead of someone else doing it for us:

We should also encourage children to work things out themselves.

subject pronouns	reflexive pronouns
I	myself
you (singular)	yourself
he	himself
she	herself
it	itself
we	ourselves
you (plural)	yourselves
they	themselves

TIPS• Some verbs that are reflexive in other languages aren't reflexive in English, for example *meet, relax* and *feel*.

• We can say *on my own, on your own, etc.* instead of *by myself, by yourself, etc.* :

I enjoy living by myself/on my own. We don't say ~~by my own~~.

She designed her wedding dress _____.

A. *on herself* B. *by herself* C. *by her own* D. *by itself*

Her great exuberance for learning prompted her to continue with her studies after high school. She became disgruntled, however, when she learned that the university in Warsaw was closed to women. Determined to receive a higher education, she defiantly left Poland and in 1891 entered the Sorbonne, a French university, where she earned her master's degree and doctorate in physics.

When another old cave is discovered in the south of France, it is not usually news. Rather, it is an ordinary event. Such discoveries are so frequent these days that hardly anybody **pays heed to** them. However, when the Lascaux cave complex was discovered in 1940, the world was amazed. Painted directly on its walls were hundreds of scenes showing how people lived thousands of years ago. The scenes show people hunting animals, such as bison or wild cats. Other images **depict** birds and, most noticeably, horses, which appear in more than 300 wall images, by far outnumbering all other animals. Early artists drawing these animals accomplished a monumental and difficult task. **They** did not limit themselves to the easily accessible walls but carried their painting materials to spaces that required climbing steep walls or crawling into narrow passages in the Lascaux complex.

Unfortunately, the paintings have been exposed to the destructive action of water and temperature changes, which easily wear the images away. Because the Lascaux caves have many entrances, air movement has also damaged the images inside. Although they are not out in the open air, **where** natural light would have destroyed them long ago, many of the images have deteriorated and are barely recognizable. Mexican painter Frida Kahlo (1907-1954) was both a talented artist and a woman of great courage. Her paintings tell an amazing story of tragedy and hope.

At the age of six, Kahlo developed **polio**, and she spent nine months in bed. The illness damaged her right leg forever. Most girls didn't use to play sports back then, but Kahlo played soccer and took up boxing. Exercising helped Kahlo get stronger. Kahlo even dreamed of becoming a doctor one day.

At 18, Kahlo was in a terrible bus crash, and her destiny changed. She wore a full body cast for months because her injuries were so bad. But again, Kahlo refused to give up. She entertained herself by painting self-portraits. She said, "I paint myself because I'm often alone, and because I am the subject I know best."

Kahlo suffered from very bad health the rest of her life, but she continued to paint. Other artists began to recognize her talent – an unusual **achievement** for a woman at the time. In 1929, she married famous Mexican painter Diego Rivera, but their marriage was troubled. Kahlo once said, "There have been two great accidents in my life ... Diego was by far the worst."

Nowadays, more industries entrust their operations to new gadgets, software and programs that can transform the workplace. One such technology that has the potential to revolutionise workplaces in the coming years is RPA (Robotic Process Automation). With more industries starting to embrace RPA software, RPA robots would be able to handle mundane, repetitive tasks like some of the clerical work normally dealt with by administrative staff, **thereby** lowering running costs and increasing productivity.

There is a common concern that companies employing technology like RPA are only interested in increasing their profit margins through cost reduction, and that this trend would eventually leave most of the workforce jobless. However, while it is true that the menial tasks of administrative and **clerical** jobs are likely to be taken over by automation, the demands on the average office worker will evolve to include more creative work, managerial duties and communication with clients and suppliers.

The skills required of future workers are also bound to change. Moving away from basic data entry skills, the worker of the future will be expected to have transferable problem-solving and **critical** thinking skills that will enable them to tackle any difficult situation and work independently to find solutions.

The ability to adapt and be agile would also be essential in a world that is likely to become increasingly volatile, uncertain and complex. This flexibility, coupled with the desire to keep learning and the initiative to step forward, the successful worker of the future is one who will be able to use their skills to find opportunities, make improvements and accept new challenges wherever they'll be working.

Section Three: Reading (Questions 33-48)
Read the following texts and choose (A), (B), (C), or (D) for each of the questions following.

(Questions 33-40)

1 Most advertising in ancient times was word-of-mouth, that is, people liked something and told others about it. Also, in Rome and Greece, in ancient times, it was, common for people to use papyrus, a kind of paper, to advertise things they had lost or found. Papyrus was also used for posters to advertise political campaigns. Many traces of these advertisements have been found in the ruins of Pompeii. The tradition of wall or rock painting as a way of advertising goods is even more ancient and examples can still be found in parts of Asia, Africa and South America.

2 Printing developed in the 15th and 16th centuries, and this increased the forms of advertising. Handbills became common. Then, by the 17th century, advertisements started appearing in weekly newspapers in England. In the 19th century mail order catalogues appeared, promoting all kinds of goods.

3 Finally, the 1960s were a key period in the development of advertising. Advertisements became more creative and more interesting. Also, they began to draw attention to the 'unique selling points' of products that make a product different from competitors' products.

4 These days, advertisers have come up with new ways of promoting their products. For example, product placement is now common. This is advertising in TV programmes or films by having a character, preferably played by a famous actor, use a particular product. For example, Tom Cruise's character in the movie, *Minority Report*, had a computer with the Nokia logo on it.

5 TV commercials are a very effective medium for advertisers, though these are very expensive. If an organization wants to have a 30-second TV advert during the annual Superbowl game in the United States, they have to pay about \$2.5 million.

6 Perhaps the most interesting development is the use of famous personalities to endorse a product. The basketball player, Michael Jordan, endorsed Nike products and wore them while playing. Getting well-known personalities to endorse a product can be very expensive, but endorsements certainly increase a product's sales, especially if the personality has a positive image in the eyes of the public.

(Questions 41-48)

1 In the 1990s, mobile phones were status symbols for wealthy businesspeople. Phones were big and heavy, and the signal was poor, so people shouted when using them. Over the next ten years, technology improved and prices fell considerably. In many rich countries the mobile phone became the teenager's favourite toy. In just 20 years, mobiles have changed the way people do business and socialise in rich countries. But mobile technology is having a dramatic impact on life in the developing world.

2 In Africa, inexpensive mobile phones in areas where there are no landline telephones has already helped many people to start small businesses. Before that, starting a business meant renting a shop or an office, which was expensive. If customers called when the owner was out, business was lost. Now business owners can write their mobile number on an advertisement, put it on a notice board and wait for customers to call them. Thus, thousands of people can find a market for their goods or services.

3 In India, fishermen now use their mobiles to find the best market for their fish before they return to shore. A few quick calls on their mobile phones can tell them which ports to visit to find the best price for the fish and avoid unnecessary waste.
