TEACHING EXPERIENCE

During my post as a clinical teaching assistant at Damascus University (March 1997-September 2003), I was actively involved in the post graduate seminar based teaching programme where I provided small group teaching regarding oral surgery and oral medicine curriculum. I was also an active participant in the weekly journal club.

I involved in IT skills demonstrating at Newcastle University/ Medical School during my PhD preparation.

Since I have returned back to Syria 2009, teaching undergraduate and postgraduate students was a part of my duty in both Damascus and kalmoon private University. This includes clinical sessions and theoretical lectures.

As a member of Syrian society council for dental research- IADR Syrian section, I have been involved in organising several annual competitions for postgrad students for Syrian dental schools.

CAREER ASPIRATIONS

My research interests are largely concerned with oral carcinogenesis and oral diseases. In addition to laser applications in dentistry.
